

# Solutions to Practice Exercise Questions

---

## Q:1 -> Solution:

```
clear all
input = "HELLO MAN HOW ARE YOU AND HOW ARE YOU DOING";
output = split(input);
output = output(end:-1:1);
output = join(output);
fprintf('The input string was \n"%s"\n \n \n', input);
fprintf('The corresponding output is \n "%s" \n', output);
```

---

## Q:2 -> Solution:

```
X = csvread('C:\data.csv');
Y = X(:,2) > 3.0;
Z = X(Y,:);

if exist('Results') == 7
    csvwrite('Results\reduced_data.csv', Z);
else
    mkdir Results
    csvwrite('Results\reduced_data.csv', Z);
end
```
